**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 9-10, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Rizkin et al (US Pat. No. 6,902,291).

Regarding claim 1, Rizkin discloses a light illuminating device comprising: at least one light emitting diode (fig. 2A, LED, 72), at least one thermoelectric module (TEM, 56, col. 4, lines 36-37) having a first surface which is thermally connected to the LED, a heat sink (130) thermally connected to a second surface of the at least one TEM, a thermally insulating (lens 22, and sealing member 24) cover creating an enclosed chamber substantially insulating the LED from ambient air (fig. 1), cl. 9, a plurality of LEDs (72, fig. 3B), cl. 10, a plurality of TEMs (56), cl. 18, (runway, col. 1, line 14).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2875

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rizken et al in view of Upadhye et al (US 2004/0194470).

Rizkin teaches the claimed invention except for the TEMs being in a stacked fashion. Upadhye teaches that the TEMs can be stacked together in order to increase heating or cooling of the unit. Therefore, it would have been obvious to one of ordinary skill in the art to stack the TEMs in order to increase cooling of the TEMs module.

#### ***Allowable Subject Matter***

Claims 2-8, and 12-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19-24 are allowed.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kamanda et al (US Pat. No 6,252,154) is cited of interest.
